## Summary

Full Stack Developer with 3+ years of experience building scalable web applications and business-oriented software solutions. Proficient in **Vue.js, Nuxt.js, JavaScript, Node.js, Express.js, MongoDB, and PostgreSQL**. Experienced in developing end-to-end B2B e-commerce workflows, RESTful APIs, payment integrations, dynamic pricing engines, shipment management systems, and third-party service integrations. Strong focus on building maintainable applications and translating complex business requirements into practical technical solutions.

## Skills

**Frontend:**
Vue.js, Nuxt.js, JavaScript, HTML5, CSS3, Tailwind CSS

**Backend:**
Node.js, Express.js, RESTful APIs, Mongoose

**Database:**
MongoDB, PostgreSQL, Supabase

**Integrations & Services:**
Stripe, Firebase, WhatsApp Business API, Meta Graph API

**Tools & Version Control:**
Git, GitHub, Bitbucket

## Experience

12/2024 – Present
Bengaluru

**TextTree Technologies (Unit of Electricway),** *FullStack Developer*

- Working on **Traderz**, a B2B e-commerce marketplace for construction and industrial products, including electrical cables, pumps, and other equipment, connecting multiple vendors with customers.
- Developing and maintaining end-to-end marketplace functionality using **Vue.js, Nuxt.js, Node.js, Express.js, MongoDB, and Mongoose**.
- Building customer and admin portals supporting the complete order lifecycle, from cart placement, negotiations, checkout, and Stripe payment integration to order processing and fulfilment.
- Implemented **Firebase integrations and WhatsApp notification services** to enable real-time updates and automated customer communication.
- Designed and developed a dynamic **Price Engine**, a dedicated service layer that calculates customer-specific pricing based on loyalty tiers and various business factors.
- Architected and implemented the complete **Shipment Management Module**, covering shipment creation, vendor-location pickups, logistics coordination, tracking, and final customer delivery.
- Contributing to the development of scalable business workflows that streamline vendor operations, order management, pricing, and logistics across the marketplace.

08/2023 – 09/2024
Bengaluru

**Vocaway Education pvt. Ltd,** *Full Stack Developer*

- Planned and implemented mobile/web applications using Flutter to enhance user experience.
- Developed web scraping solutions using Scrapy to extract data from various websites and load it into our database for improved data accessibility.
- Led implementation of version control systems using Git and GitHub to streamline collaboration among development teams.

## Education

2023 — **Bachelor of Engineering in Computer Science and Engineering,**
*Ballari Institute of Technology and Management*
7.8

2019 — **Pre University Course,** *Sri Chaitanya Pre-University college*
Ballari — 75.38

2017 — **SSLC/ 10th STD,** *Sri Chaitanya Techno School*
Ballari — 84.48

## Project

**Traderz - Multi-Vendor B2B E-commerce Marketplace,** *TextTree Technologies*

- Contributed to the development of a scalable B2B e-commerce marketplace connecting multiple vendors and customers across construction and industrial product categories.
- Developed customer-facing and administrative applications using Vue.js and Nuxt.js, backed by Node.js, Express.js, MongoDB, and Mongoose.
- Implemented backend services and business logic supporting product management, customer-vendor negotiations, order processing, dynamic pricing, payment integration, and shipment workflows.
- Designed modular service-layer components for customer-specific pricing and integrated third-party services, including Stripe, Firebase, and WhatsApp Business API.
- Built administrative functionality to support vendor operations, inventory management, order coordination, and logistics workflows..

**Tech Stack:** Vue.js, Nuxt.js, Node.js, Express.js, MongoDB, Mongoose, Stripe, Firebase, WhatsApp Graph API.

**RetroQuest (Personal Project)**

- Developed a responsive web-based retro gaming platform that allows users to play classic games from NES, Game Boy, Game Boy Advance, and Sega Genesis directly in their browsers.
- Built the frontend using Nuxt.js and Tailwind CSS, focusing on responsive design and seamless gameplay across desktop and mobile devices.
- Integrated **EmulatorJS** to provide in-browser emulation and support multiple retro gaming platforms.
- Implemented game progress management using EmulatorJS's native save/load functionality and browser local storage, allowing users to save and restore their progress.
- Added external gamepad support to provide an authentic gaming experience.
- Curated a collection of classic titles, including Super Mario Bros., Castlevania, Sonic the Hedgehog, and Contra.

**Tech Stack:** Nuxt.js, Vue.js, Tailwind CSS, EmulatorJS, JavaScript, Local Storage.

**Project:** https://lnkd.in/gR47mr6j

**Convene,** *Vocaway Education pvt. ltd*

- Convene serves as an innovative mobile platform developed using Flutter, empowering rural communities through modern technology.
- Convene features a rental service, crop tracker, community chat, job search tailored for village communities, freelancer marketplace, and village announcements.
- An all-encompassing app that seamlessly integrates rental services, crop tracking, community chats, job searches, and a freelancer marketplace, tailored for enhancing connectivity in rural communities.

**Tech Stack:** Flutter, Dart,Supabase.
